Part 2

MVP:

- Give the option to make account
- Allow for 'favorite restaurants
- Allow for preferred meal creations
- Give options for restaurant in area
- Give menu and food options for each restaurant
- Give detailed information about order before placing order
- Have tips for drivers implemented automatically
- Allow for communication between driver and customer

User stories:

1. As an organized person, I want to have my own account so I can track my past orders and meals so I can keep track of what I liked and what I didn't
2. As a work from home employee, I want to be able to quickly order from my favorite restaurant for lunch so I don't spend time away from work.
3. As someone who hates the process of ordering food, I want to order my favorite meal as a default so I don't waste time explaining how I prefer my meal
4. As someone who is new in town, I want to know the options I have in my area to get food so I know exactly what I have available for delivery
5. As someone who is unfamiliar with the menu, I want to have the menu accessible so I can decide on what I can eat from that restaurant
6. As a picky eater, I want to see what I am about to order before buying so I can make sure there's nothing in my order that would ruin my meal.
7. As a delivery driver, I want to be compensated for my driving and work so that I am making the money I deserve
8. As a delivery driver, I want to communicate with the customer so that they can have updates on their delivery and also be able to give further details and preferences on the delivery process.
